

## Installing Motorola V276 Battery

### Parts relevant to this guide

- [Lithium ion battery](#)

### Step 1 - Battery

- Locate the silver button near the bottom of the back of your phone.
- Press the button with one hand while sliding the back cover of the phone away from the antenna.
- The back cover should slide off easily.

### Step 2

- Insert the spudger near one corner of the battery (preferably one furthest from the phone's antenna).
- With a firm grip, gently lift the end of your tool up. The battery should easily raise out of its place.
- Now that the battery is easy to get a hold it, use your hands to take the battery out of the phone.

### Step 3

- Note the metal connections on the phone, which are now exposed with the battery removed.
- There are corresponding metal connectors on the replacement battery.
- When you install the battery, be sure both connectors are matched up. Otherwise, your battery will be unable to supply power to your phone.
